

## How to use and care for reusable lunchwraps and bags

These are a reusable alternative to plastic clingwrap. They can keep a sandwich fresh and sticky/leaky contents contained, while being able to be washed and reused again and again. Easy for kids to use, fun and colourful. The Lunchwraps become a handy placemat to keep crumbs contained too! Made with a cotton outer and a food-safe "Procare" moisture-proof fabric inner layer.

The "Sandwich" & "Snack" bags can replace "Ziplock" bags or individually packaged foods. Useful for kids recess, snacks in the car or cinema... Any time you need a snack. Great for items such chips, crackers, popcorn, homemade muesli bars, nuts, fruit slices, mini muffins, biscuits, dried fruit, carrot/celery sticks... and more.

### Washing Instructions

Wash before first use. You can hand wash them with the dishes each night, and they may be dried enough for use the next day. Or you may wipe them down with a cloth. However full machine washing each time they are used is recommended to ensure they are thoroughly cleaned, especially if they have been used with meat or dairy products. They should be allowed to fully dry before being used again.

Open the bags and turn them inside out for washing, to make sure they are fully cleaned on the inside. Bags and wraps with velcro closure can be turned inside out or "backwards" and the velcro done up, to help prevent it snagging other items in the wash (or use a lingerie bag to wash them in).

The "procare" moisture-proof fabric can be melted if subjected to high heat - do not use these in a dishwasher, do not tumble dry and do not iron. If you really feel the need to iron the your lunchbags/wraps, do so on a very low heat setting, ironing the outer fabric side only and not the white inner lining material.

### How to fold up a lunchwrap

Place the food items in the centre, fold the sides over tightly, then fold the bottom up and the top over.

### How to use the ribbon closure bags

The Sandwich and Snack bags come with a velcro or ribbon closure. The ribbon closure gives a nice colourful option that won't get snagged in the wash.

Place the food items into the bag, Fold the flap closed under the ribbon strap.
